Company Name:	ITW CAP Offsite

Trading As: ITW Construction Asia Pacific

ABN: 63004235063

# About APCO

Australian Packaging Covenant Organisation (APCO) is a co-regulatory not-for-profit organisation leading the development of a circular economy for packaging in Australia. APCO's vision is a packaging value chain that collaborates to keep packaging materials out of landfill and retains the maximum value of the materials, energy and labour within the local economy.

Each year, APCO Brand Owner Members are required to submit an APCO Annual Report and an APCO Action Plan. This document is the Annual Report and Action Plan output for the organisation listed above. This document provides the overall performance level of the organisation, as well as any commitments they have made to work towards on their packaging sustainability journey. This document may also include additional information provided by the Member in their report.

# **Overall Performance Leading**

The chart below indicates the overall performance level of this organisation listed above in the 2025 APCO Annual Report. The organisation's reporting period was January, 2024 - December, 2024.

Understanding APCO Annual Reporting performance levels:

1	Getting Started:	You are at the start of your packaging sustainability journey.
2	Good Progress:	You have made some first steps on your packaging sustainability journey.
3	Advanced:	You have taken tangible action on your packaging sustainability journey.
4	Leading:	You have made significant progress on your packaging sustainability journey.
5	Beyond Best Practice:	You have received the highest performance level and have made significant progress on your packaging sustainability journey.

## **Additional Information**

The information below indicates additional information that the organisation included in their APCO Annual Report.

Describe initiatives, processes or practices that you have implemented during your chosen reporting period that have improved packaging sustainability

We gathered all the packaging specifications. We have reviewed our findings flagged all our plastic packaging and requested the removal of unnecessary plastic packing or replacing it with recycled paper packaging. Where plastic is necessary we have requested the plastic be changed to a good plastic (PP, LDPE or HDPE). These changes are to be implemented for the reporting period calendar year 2025. We have also implemented the change of cardboard packaging to FSC,PEFC certified cardboard and also cardboard containing recycled material.

Describe any opportunities or constraints that affected performance within your chosen reporting period

When liaising with suppliers who only supply us with a small number of SKU's and overseases suppliers it is at some times difficult to convince the supplier to come on the packaging sustainability journey with us.

Please use the space below to provide examples or case studies of exemplary packaging sustainability conducted by your organisation.

Our packaging review findings have enabled us to identify and remove 15,240 plastic bags to date from landfill, this will total 87,000 in a 12 month period. We did this by completely removing all plastic bags from certain products.

### **APCO Action Plan Commitments**

For each of the Packaging Sustainability Framework criteria listed below, a description is provided along with the commitments made by the organisation in their APCO Action Plan.

#### Criteria 1:

#### Governance & Strategy:

This criteria considers actions to integrate packaging sustainability into business strategies.

- Develop a strategy that includes goals (objectives) and targets for packaging sustainability that addresses the Sustainable Packaging Guidelines (SPGs) or equivalent.
- Include a commitment to achieving the 2025 National Packaging Targets in our strategy.
- Have our executive or board of directors review our strategy and have the strategy integrated within our business processes.
- Regularly communicate and promote packaging sustainability objectives and targets within our organisation.
- Regularly engage or communicate with our external stakeholders about the environmental impacts of

2025

our packaging.

#### Criteria 2:

#### Design & Procurement:

This criteria considers actions taken to ensure that sustainability principles are considered in the design or procurement of both new and existing packaging through use of the Sustainable Packaging Guidelines (SPGs).

- Review 100% of our packaging against the Sustainable Packaging Guidelines (or equivalent).
- Improve the accuracy of our data regarding reviews of packaging using the Sustainable Packaging Guidelines (or equivalent).
- Incorporate the Sustainable Packaging Guidelines (or equivalent) into procurement processes.
- Consider the following Sustainable Packaging Principles in our packaging reviews:
  - Design for recovery
  - Optimise material efficiency
  - Design to reduce product waste
  - Eliminate hazardous materials
  - Use of renewable materials
  - Use recycled materials
  - Design to minimise litter
  - Design for transport efficiency
  - Design for accessibility
  - Provide consumer information on environmental sustainability
  - 12% of our packaging to be optimised for material efficiency.
- Improve the accuracy of our data regarding packaging material efficiency.

#### Criteria 3: Recycled Content:

This criteria considers actions taken to increase or optimise the amount of recycled material used by your organisation.

- Develop a policy or procedure to buy products and/or packaging made from recycled materials.
- Use recycled content in:
  - Primary packaging that we use to sell our products
  - Secondary packaging that we use to sell our products
- 81% of our packaging to be made using some level of recycled material
- Improve the accuracy of our data regarding use of recycled materials.

#### Criteria 4:

#### Recoverability:

This criteria considers actions taken to improve the recovery of packaging at end-of-life and increase use of reusable packaging.

- 86% of our packaging to be designed to have all packaging components be recoverable at end-of-life.
- Improve the accuracy of our data regarding recoverability.
- Use PREP to assess the recyclability of our packaging through kerbside collection in Australia and/or New Zealand.
- Investigate opportunities to use reusable packaging.

#### Criteria 5: Disposal Labelling:

This criteria considers the extent to which packaging has been labelled to help consumers determine what to do with packaging at end-of-life.

- 100% of our packaging to have on-pack labelling to inform correct disposal.
- Improve the accuracy of our data regarding labelling.

#### Criteria 6: On-site Waste:

This criteria considers progress in increasing the amount of on-site solid waste being diverted from landfill.

- Have recycling programs for the following materials:
  - Paper/cardboard
  - Soft plastics
  - Glass
  - Metals
- Aim for 65% of our on-site waste to be diverted from landfill.
- Improve the accuracy of our data regarding on-site waste.

### Criteria 7:

### Problematic Materials:

This criteria considers the extent to which organisations are actively phasing out problematic and unnecessary single-use plastic packaging and preventing/reducing litter.

- Help reduce litter by:
  - Conducting regular clean ups
  - Participating in Business Clean Up Day
  - Delivering a litter education campaign
  - Ingleburn Team Joins Sea Shepherd Event to Clean Coogee Beach and participated in Campbelltown Bush Care Program

Business Eco Champions discuss and share various ways to protect the environment Pryda actively promote the use of sustainable building materials in dwelling construction

Phase-out the following problematic and unnecessary single-use plastic items:

- Fragmentable (e.g. oxo-degradable) plastics
- Rigid polyvinyl chloride (PVC) packaging
- Rigid plastic packaging with carbon black
